

March 27, 2026

Good morning I.S.201! This is Grace Zhang from class 832, here with you on behalf of the S.E.A.L. Team.

Using your imagination to solve problems helps you think in new and creative ways. Instead of always doing things the usual way, you can come up with different ideas and try new approaches. For example, if something isn't working, you can look at the problem from another perspective and think of a solution that others might not notice right away. This makes solving problems more interesting and helps you become more creative. When you use your imagination, you also become more willing to try new things and take chances. Even if your ideas don't always work, they are still helping you learn and improve. It shows that you're not afraid to think differently and find your own way to solve problems. Overall, using your imagination can help you come up with unique solutions and make you more confident in your ability to face challenges.

Like Albert Einstein, the affirmation of the day is, "I believe every person can make a difference."

Thanks for listening and have Fresh-Minded Friday 😊

## S.E.A.L. Team Pledge

We are the Dyker S.E.A.L. Team

Positivity is our dream

We teach it every day

To help others live the optimistic way

We learn to control our emotions and feelings

So, we always have effective social dealings

No stone left unturned; no person left behind

Every member of our team has the power to be kind

We spread kindness to our friends, families, and those who need a smile

When facing hardships and adversity, the S.E.A.L. Team goes the extra mile
